...and your question is?

OriginalGriff 23-Jul-15 2:01am   Reply

DON'T SHOUT. Using all capitals is considered shouting on the internet, and rude (using all lower case is considered childish). Use proper capitalization if you want to be taken seriously.

Mukesh Pr@sad 23-Jul-15 2:13am   Reply

post your model class in which you are getting validation error..!

ZurdoDev 23-Jul-15 8:18am   Reply

See the errors for more details.

Use exception handler to get detailed error info as given below.

                                                                    Hide   Copy Code

```
try
{
```

```
    // Your code...
    // Could also be before try if you know the exception occurs in SaveChanges

    context.SaveChanges();
}
catch (DbEntityValidationException e)
{
    foreach (var eve in e.EntityValidationErrors)
    {
        Console.WriteLine("Entity of type \"{0}\" in state \"{1}\" has the following validation
errors:",
            eve.Entry.Entity.GetType().Name, eve.Entry.State);
        foreach (var ve in eve.ValidationErrors)
        {
            Console.WriteLine("- Property: \"{0}\", Error: \"{1}\"",
                ve.PropertyName, ve.ErrorMessage);
        }
    }
    throw;
}
```

When answering a question please:

1. Read the question carefully.

2. Understand that English isn't everyone's first language so be lenient of bad spelling and grammar.

3. If a question is poorly phrased then either ask for clarification, ignore it, or **edit the question** and fix the problem. Insults are not welcome.

4. Don't tell someone to read the manual. Chances are they have and don't get it. Provide an answer or move on to the next question.

Let's work to help developers, not make them feel stupid.
